

ACUMED®

From the Finger Tip to the Shoulder

**Innovative solutions to today's
orthopaedic challenges**

Acumed Upper Extremity Meeting

**July 4-5, 2008
Nice, France**

Registration Deadline is June 2nd, 2008

The Course

“From the Finger Tip to the Shoulder” is a unique course with an exclusive focus on the upper extremity. Leading experts will instruct meeting attendees in the form of lectures and hands-on workshops with sawbones. This one and a half day course will cover topics including treatment of fractures and arthritis with a variety of techniques. Lab time, surgery demonstrations and in depth lectures will provide an enriched learning environment for meeting attendees.

Topics will be presented in three sections: Shoulder, Elbow and Hand/Wrist. Each section will be moderated by a course chairman with extensive clinical experience. Attendees are encouraged to share their clinical experiences to gain knowledge from the speakers and other meeting attendees. “From the Finger Tip to the Shoulder” is designed to address challenges associated with upper extremity surgery and provide attendees with valuable information to incorporate into their practices.

The Location

Overlooking the Baie des Anges and the Mediterranean Sea, Le Méridien Nice allows guests to explore the rich history and refined simplicity of Southern France. This hotel offers a state-of-the-art conference centre, with a total of 10 fully modular meeting rooms, all on one floor. These superb conference facilities comprise a large, convertible conference room seating up to 600 people, with all the latest high-technology equipment. In addition, Le Riviera room, totalling 210 square metres, enjoys a breathtaking view of the Baie des Anges and is ideal for business meals.

The Course Chairmen

David Stanley BSc (HONS), FRCS

- Consultant Orthopaedic Surgeon, Northern General Hospital, Sheffield, UK.

Mr Stanley studied medicine and physiology at King's College and St. George's Hospital Medical School in London. He has published extensively in peer reviewed journals on upper limb disorders and maintains a significant research interest in shoulder and elbow pathology. Mr Stanley's major interest is in elbow surgery and he has edited a textbook on surgery of the elbow.

Nicholas J. Goddard MB, FRCS

- Consultant Orthopaedic Surgeon,
The Royal Free Hospital and School of
Medicine, London.

Mr Goddard is author or co-author of almost 70 articles and abstracts, and 22 book chapters. He is well known on the national and international symposium circuit collaborating with Dr. Slade, Yale on many occasions. He is a member of numerous professional societies, including the American Academy of Orthopaedic Surgeons, Royal Society of Medicine, the World Federation of Hemophilia and the British Orthopaedic Association.

Boyd S. Goldie MB, FRCS

- Consultant Orthopaedic Surgeon, Whipps
Cross University Hospital, London.

Mr Goldie's practice is entirely confined to the upper limb. He treats both elective and trauma patients. He is a faculty member for the AO Hand Fracture Fixation Course in the UK.

The Course Faculty

Shawn W. O’Driscoll, PhD, MD

- Professor of Orthopedic Surgery,
Mayo Clinic, Rochester, MN

Dr. O’Driscoll is a pioneer in elbow surgery, recognized for innovative advances in elbow trauma and reconstructive surgery. His “principle-based approach” to the treatment of complex elbow fractures has been adopted by experienced elbow surgeons around the world.

Christos Sinopidis, MD

- Consultant Orthopaedic Surgeon, The Royal
Liverpool University Hospital, UK.

Mr Christos Sinopidis has been a consultant orthopaedic surgeon for six years and has participated in many meetings and workshops internationally. His practice focuses on shoulder and elbow surgery, including arthroplasty and arthroscopic surgery. He runs a tertiary referral trauma service for complex shoulder and elbow trauma and continues to be interested in research.

Danny Brown FRCS

- Consultant Orthopaedic Surgeon, The
Royal Liverpool University Hospital, UK.

Mr Brown graduated from the University of Manchester Medical School and underwent post-graduate training in Merseyside. He has undertaken a “plastics” hand fellowship, and deals solely with upper limb pathology. With a particular interest in wrist trauma, Mr Brown has a great deal of experience in plating wrist fractures using both a volar and a dorsal approach.

Manjit S. Bhamra ChM, MEd, FRCS

- Consultant Orthopaedic Surgeon, Honorary Senior Clinical Lecturer, UK.

Mr Bhamra is one of the first surgeons in the UK to use and publish results on the Polarus Humeral Nail and Modular Shoulder. His main interests have been in shoulder and hip surgery. He continues to take an active part in shoulder trauma and management.

John M. Itamura, MD

- Associate Clinical Professor, Department of Orthopaedic Surgery, USC Keck School of Medicine, USA.

Dr. John M. Itamura is an Associate Professor at the University of California. He specializes in elbow and shoulder surgery and is a member of the American Shoulder & Elbow Society. Dr. Itamura has published numerous articles on Radial Head Fractures.

Joseph J. Dias FRCS

- Professor of Hand and Orthopaedic Surgery, University of Leicester, UK.
- Consultant Hand and Orthopaedic Surgeon, University Hospitals of Leicester, UK.

Professor Joseph Dias is the current Vice President of the Leicester Medical Society. His research interests include Scaphoid Fractures, Wrist Fractures, Epidemiology and Outcome of Hand Disorders.
